

AN-311 Targeting Success with the Elite System

The Elite Voyager System combines many features and facilities. We suggest that the following points will highlight success strategies.

System

- Implement a “system of use” & ensure all users comply with company policy.

Data

- Long term data storage is often essential for public liability and insurance claims,
- We suggest keeping data for up to 10 years (along with all staff records of course),
- Raw data files should be stored “off site” along with data-base settings information,
- Backup your data regularly!

Reporting

- We recommend a regular report is done to check the system and its users.

Equipment

- Keeping data wands charged is essential,
- Keep clock in your PC accurate and checking the XL Unloaders’ clock is essential,
- Regular unloading is recommended to ensure wands do not become full,
- Regular unloading helps keep staff motivated,

Reporting Software

- Elite Reporter data base system is reliable, fast and robust.
- Regular backup the “db” data base folder is recommended,
- Any data base system can be damaged by resetting, faulty computers or power-downs at critical times.

Best of all – we will help you and make it as easy as possible!
