

AN-317 Quick Update of Elite Reporter & Elite Unloader Programs

Overview – What is required

There are three ways to update your programs; via the internet, via a self loading update CD, via a new installation CD.

Updating Via Self Loading Update CD

The automatic update CD will ask you if you want to update each program then it will copy them from the CD into your computer at the normal locations of "ProgramFiles\EliteID\EliteReporter" folder.

Updating Via Internet

The Elite-ID website of www.elite-id.com.au has a software section. You can download the XL Unloader program and update your PC.

Make sure you save the XL Unloader program over the top of the older version at the folder of "ProgramFiles\EliteID\EliteReporter".

Updating Via Installation CD

- Put the Elite System CD into CD drive of computer. Wait for drive "busy" light to go out.
- It will probably auto start into the normal installation screen. CLOSE IT OFF.
- Get into Windows Explorer. Find the CD.
- Use Windows Explorer to select the "Update_Unloader" folder on the CD.
- Copy the executable file "XLUnloader.exe" by selecting the file then press "Edit...Copy"
- Select you computers "C" drive. Select the "ProgramFiles\EliteID\EliteReporter" folder.
- Paste the file with "Edit...Paste". You will be asked if you want to over-write the file. Answer yes.
- Repeat for Reporter....Select the "Update_Reporter" folder on the CD. Copy the Executable file.
- Select the "ProgramFiles\EliteID\EliteReporter" folder on your PC.
- Paste the new version of Reporter into it.

That is all – you have just copied in the new executable files and it should all work.
